Dear Mr. Waugh:

I strongly believe that we need to do everything possible to reduce or eliminate all emissions from port activity. It is my understanding that Cold Ironing Vessels will stop ships from burning fuel, which reduces air contamination.

Because citizens of Carson and other communities are impacted by the emissions from ships at the Los Angeles and Long Beach harbors I favor Cold Ironing Vessels at our ports.

Sincerely,

Julie Ruiz-Raber  
Mayor Pro Tem  
City of Carson
